Operational/Engineering

Evaluation Report on Infrared Equipment

REFERENCE: []

50X1

1. [] report on the infrared equipment as requested in reference has been delayed pending completion of tests over line-of-sight paths which simulate the conditions encountered in clandestine installation and operation of the equipment. Our previous tests in the [] area have been limited to strictly ideal condition alignment tests on the [] which has not offered opportunity for reporting in the comprehensive manner requested in reference.

50X1

50X1

50X1

2. Recently we have acquired a line-of-sight testing path between a staff employee's apartment and the [] which will provide the necessary physical security protection at both ends of the circuit. Day and night time testing under line-of-sight conditions generally present for a clandestine cross-border type circuit may be undertaken.

50X1

50X1

3. We also wish to receive ORRIN's report on infrared experience gained in [] during the training of [] before completing our final area report on the equipment. Procurement of two acceptable and secure line-of sight infrared terminal points in [] has also been a problem during [] training.

50X1

50X1

50X1

4. Our report will be forwarded as soon as testing and training experience in the [] areas are completed.
